

Installation Steps for Microsoft Integration DeUC:

1.) Install jdxp manually or from Marketplace.

2.) Add "Approvals" App in Microsoft Teams

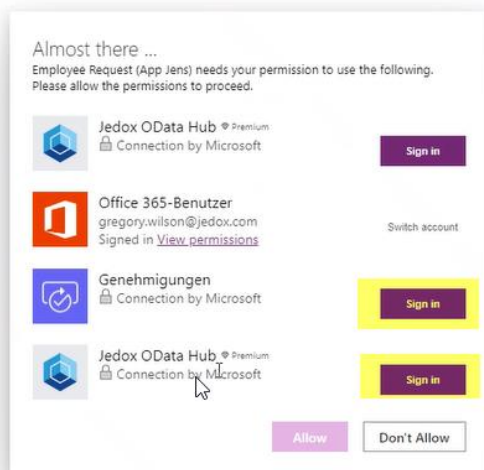

3.) Add the Instance and Power App in the Settings and click "Request New Employee" button from the report

4.) Start the free trial version of Power App

5.) Request access to "Employee Request" Power App and restart it

6.) Log in to the Approvals App → it should work fine with SSO

7.) Log in to your cloud machine → use the second button and enter your credentials

tested with Version 2.0.0

minimum recommended Jedox Version is 2022.4
