

## **API Key for ChatGPT**

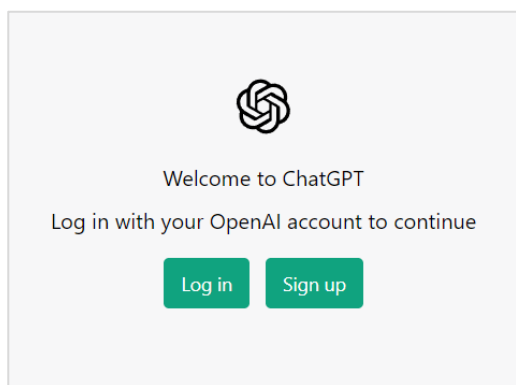

Below are the basic steps to create an OpenAI account and get started with the OpenAI Chat API. Detailed steps with screenshots follow.

1. Go to the website [ChatGPT | OpenAI](#) and click on the "Sign Up" button. You will be taken to a page where you can create your OpenAI account.
2. Enter your name, email address, and a password, then click on the "Create Account" button. You will need to verify your email address and sign in with your new credentials to continue.
3. Once you have signed in to your account, you will be taken to the OpenAI dashboard. Click on the "View API keys" link in the right-hand menu "Personal".
4. Click on the "Create a new secret key " button to create a new API key.
5. Once you have created your API key, you will be taken to a page where you can view your API key details. Copy the key and keep it in a safe place, as you will need it to access the OpenAI Chat API.

*Note: OpenAI may update their authentication process, so the screenshots or the steps shown here may change over time.*

## Detailed steps

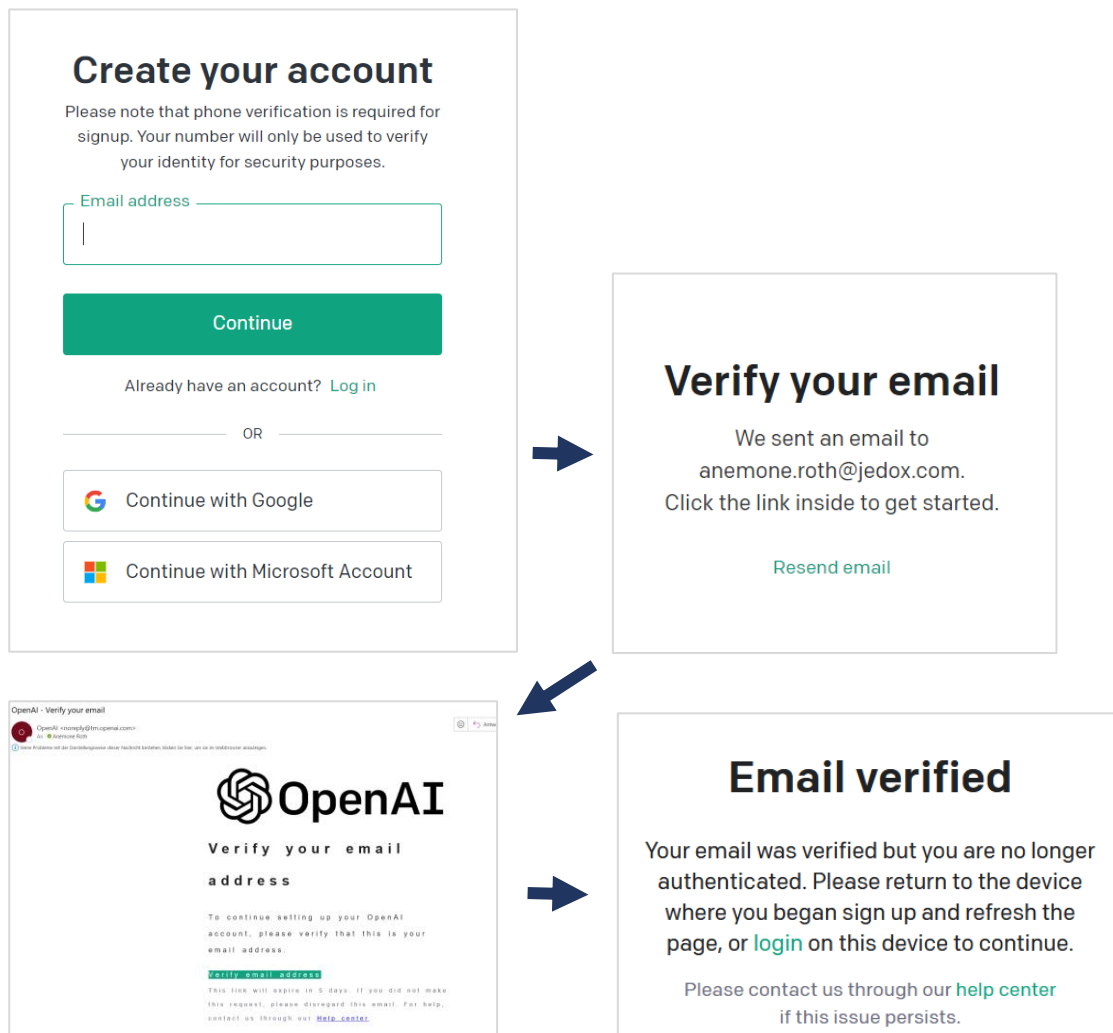

Go to the website [ChatGPT | OpenAI](#) and click on the "Sign Up" button.

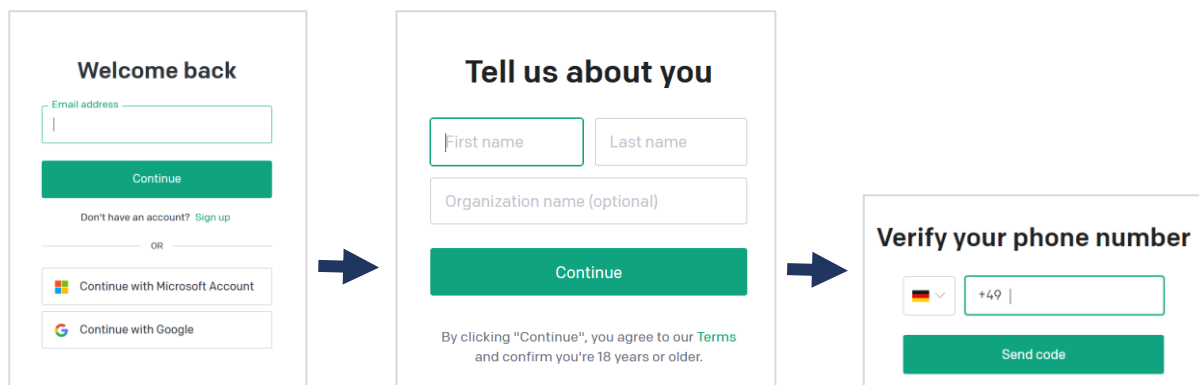

You will be taken to a page where you can create your OpenAI account. Enter your name, email address, and a password, then click on the "Create Account" button. You

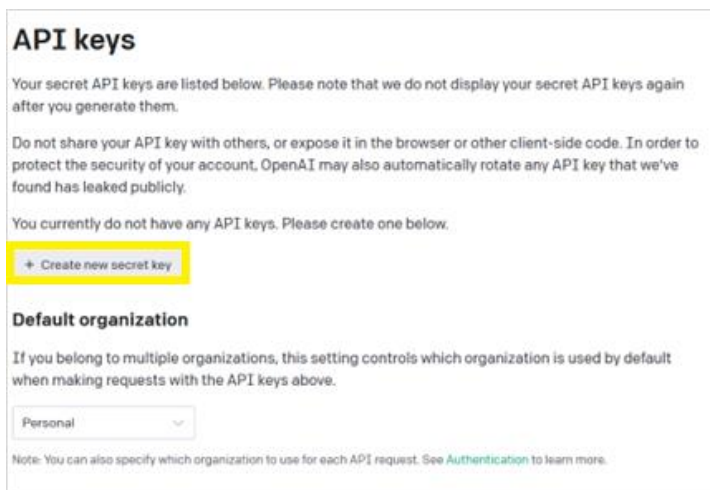

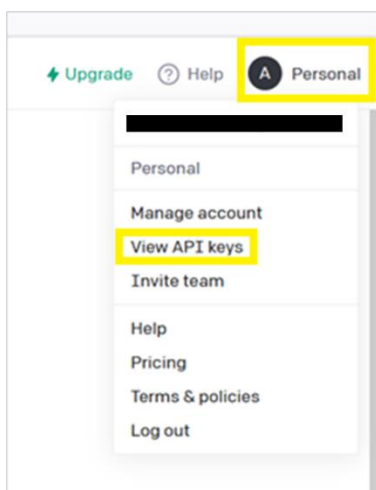

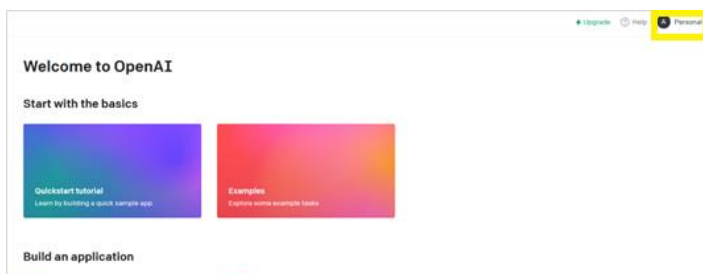

will have to verify your email address. Check your mailbox (including spam folder) to verify your email address.

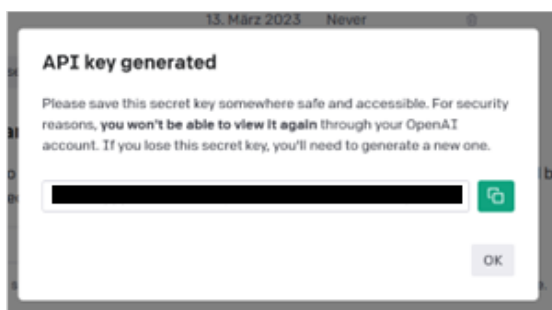

After verifying your email address go to the login page, enter your email, and sign in.

Now go to **Personal → View API keys** to create a new secret key (API key). An API key is a unique code that allows you to access an API (Application Programming Interface). API keys serve as a form of authentication and authorization, allowing you to access specific functionalities of an API or to access data from a web service.

Once you have created your API key, you will be taken to a page where you can view your API key details. Copy the generated API key and keep it in a safe place because it will not be displayed again.

Here you can see an overview of created API keys:

### API keys

Your secret API keys are listed below. Please note that we do not display your secret API keys again after you generate them.

Do not share your API key with others, or expose it in the browser or other client-side code. In order to protect the security of your account, OpenAI may also automatically rotate any API key that we've found has leaked publicly.
